DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-75 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al. (Miller), U.S. Patent No. 5,640,569.

Miller discloses a method of conducting an online auction between a plurality of potential bidders, the plurality of potential bidders competing for a lot having at least one product, comprising receiving a first bid and a second bid.

Miller does not disclose storing the information reflective of the submitted first bid nor enabling the second bidder to view a bid originally defined in a context of the first bidder in a context of the second bidder.

Miller does disclose as prior art the English auction which provides bid information of one bidder to other bidders.

The advantage of the English auction is that it permits several bidders to collectively determine the fair value of a bidden upon item.

Therefore, it would have been obvious to inform the second bidder of the first bidder's bid in the method of Miller.

Storing information is a well known function of computer systems and, to provide a means to recall desired information, it would have been obvious to use.

Miller discloses a system for conducting an online auction.

Miller discloses a computer program (Table I).

Double Patenting

Claims 1-75 of this application conflict with claims 1-75 of Application No. 08/282,156. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.
